

WELCOME TO THE BC ENVIRONMENT INDUSTRY ASSOCIATION

Our Vision

~To develop the environmental industry in British Columbia through innovative environmental business and technology solutions~

The BC Environment Industry Association (www.bceia.com) is British Columbia's most recognized and longest running professional business association dedicated to Member companies that operate in the environment industry – a robust, multi-billion dollar segment of the global economy.

Comprised of world-class engineering and environmental service companies, technology providers, research organizations, government agencies and environmental law firms, the BCEIA offers a diverse range of expert knowledge on the business of protecting the environment.

Our Mission

~To foster the growth of the industry and to promote technology development and innovation in the sector~

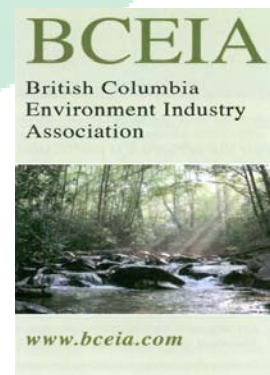

Supported by the **GLOBE Foundation of Canada**, the BCEIA is committed to networking within the industry; establishing an effective industry liaison and advocacy presence; strengthening business development and competitiveness and increasing the profiles of its Members.

Our Future

~To evolve and harmonize the environment industry's burgeoning sustainable development portfolio~

In British Columbia and elsewhere in Canada, the environmental sector is undergoing a process of re-orientation and renewal. The waning focus on pollution prevention at the source not only is decreasing the demand for traditional and often more expensive end-of-pipe pollution control technologies, it is spurring the need for more energy-efficient and pioneering technologies for application in the primary resource, manufacturing, energy and service sectors.

Climate change and the need for clean and renewable energy are driving forces as the environment industry redefines itself through the formation of new alliances and partnerships with governments and academia focused more broadly on sustainability. Changing environmental management practices in the private sector, new approaches to public policy making with respect to environmental protection, and shifting economic forces globally are helping to reshape the environment industry of British Columbia and the vital role that the BCEIA plays.
